

ZOOM First-Time User Set-up

ZOOM is a video conferencing system (like Skype) and is a pretty straight forward. The set-up requires the user to create a free account (your basic steps of creating a username and a password). Once this step is done, then download the free software application on whatever system you decide to use to Video Conference in--(mobile phone, ipad, laptop,Desktop etc).

Here's the link to ZOOM:<https://zoom.us/>

once set-up is complete--You are ready to Video Conference and/or phone in.

**Just remember your username and password for next time.
